

Ellipse Series

The shape of Ellipse represents the most innovative design in the Fin-Bin® Litter Bin Series – and the most FinBin® fastening alternatives can be used! This award-winner was designed by Heikki Meriläinen.

The precisely measured shape and size of the aperture keeps the rain and birds out. The hinged door opens sideways, at the same time removing the top providing free access for maintenance.

Ellipse 60 and 100 can be equipped with a cigarette disposal unit. The ashtray is placed on top of the litter bin for easy access. The ash container is made in stainless steel and can be emptied by opening the front door and unhooking the container from its hook.

Solid and durable, Ellipse bins are supplied in

stainless steel or powder coated galvanised steel.
