GIRO

Giro

The wall-mounted Giro bicycle rack is a practical and space-saving solution for storing up to five bicycles. The rack is equipped with sliding hooks that move along a horizontal rail, allowing bicycles to be removed and put back easily without damaging the bicycles next to them. The hooks are covered with a soft protective material that helps prevent scratches and damage to the wheel rims. The rack also has a locking ring for securing bicycles with a cable lock or U-lock. With a maximum load capacity of 150 kg, it is also suitable for storing electric bicycles.

The durable steel structure of the bicycle rack is made of round, square and rectangular steel tubes. Hooks at two different heights allow bicycles to be placed compactly. The structure is fixed to the wall with six screws and wall plugs, ensuring a stable and secure installation.

PRODUCT CODE: M045C

Brand: MOTTEZ

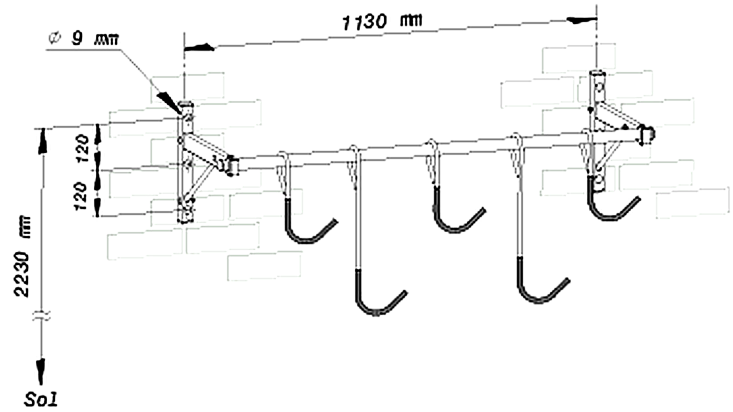

Dimensions

M045C
Length: 1190 mm
Width / depth: 370 mm
Height: 310 mm
Horizontal rail
length: 1180 mm
Maximum
load: 150 kg
Number of bicycles: 5
Weight: 6.75 kg

Installation

Wall-mounted with 6 screws and wall plugs (not included)

Materials

Hot-dip galvanized and powder coated
