

Swings for children made of different materials such as wood and steel. Resistant to abrasion, corrosion and bad weather conditions.

The user can independently set the swing in motion or stop it by using the ropes. To close the entrance, pull the ramp with the side chains and block it with the handrail. To open it, lift the rim blocking the ramp. The truck is immobilized using a brake. The swing includes rubber bumpers on both sides.

For safety reasons, it is recommended to install a fence around the swing as well as an information board.
